<td><strong>Guest Accounts for Wireless Access</strong></td>
<td>Bob Kostrubanic reported that Odyssey is not essential for guest accounts. A wireless card should be sufficient. Students must have Odyssey but they should be able to get it on their first attempt to connect on campus. (Bob will verify this.) He also said all network connections will be locked down but not until the end of the semester. Location points can approve guest accounts for any period up to seven days. The committee agreed that guest accounts should only be issued after the presentation of a valid identification. Bob clarified that a guest account will provide internet access only and not access to any other campus resources. The committee approved the policy as revised. Bob will make the changes and present an updated draft at the next meeting.</td>

Emergency Access to Employee E-Mail

The committee agreed that, in order for "someone" to have access to an employee's e-mail, the employee's supervisor at the director/dean level or higher must give written permission. It must also be understood that only one employee has access to a given e-mail account, so giving access to someone else locks out the original account holder. Bob will organize this in a policy statement to be added to the ITS web site.

Jim Ferguson was asked to determine the best method for informing all employees that their IPFW e-mail account is university property just like paper files.

Other

Susan Hannah reported that appointments to the Instructional Technology Coordinating Committee have been made.

The deans asked about problems with the on-line Form 36 approval for Continuing Studies.

The Serena Collage consultants had a successful visit. Training is now being designed, and the software should be available by spring break.

Bob Kostrubanic will provide a web conversion project status report at the March meeting.

Future Agenda Items

Discussion of proposal to establish a Web management unit (after receipt of communications consultant report)

Report on GIS software selection and funding - ARCGIS has been found to be incompatible with some network software.

Report on plans for expanding wireless access beyond the current 75 points of access, including exterior access.

Report on Breeze licensing

Report on status of ITS software development projects and process for establishing priorities
