Allen County Strategic Plan update, 2011

About the Allen County Strategic Plan
Awarded the County Achievement Award in 2011 by the Association of Indiana Counties

Beginning in February of 2008 and concluding in May of 2009, Allen County's Elected Officials and Department Heads, along with their staffs, worked on creating a Strategic Plan for the County. To our knowledge, this Strategic Plan is the first of its kind with respect to county government in Indiana.

Participation in the project was voluntary and demonstrated cooperation among separately elected office holders and appointed department heads, working towards a shared community vision and mission, and common County-wide goals. Twenty five offices and department participated in the plan.

As the project progressed with the help of an outside consultant, it did not take long for this to become an internally driven project with the creation of a Strategic Plan Executive Committee. Most traditional local government strategic plans are community development plans; this initial plan took the path of being an internal "business" plan for each department. This resulted in over 400 department-level objectives proposed to be completed over the next five years! All of the submitted department and office objectives, activities and tasks, and measures have been compiled and the strategic plan document is to be updated yearly.
