

Dolciani Mathematics Enrichment Program

Call for Proposals

The Mary P. Dolciani Halloran Foundation has provided funding for the Mathematical Association of America (MAA) to award grants for projects designed to develop mathematical enrichment programs for talented students in middle school or high school. The goal of the program is to interest students who are ready for more challenge in the study of mathematics and encourage them to further their mathematical studies. Projects should provide enrichment and extension activities for students which lead to heightened interest in and appreciation of mathematics. The projects should encourage students to continue studies of mathematics in high school and college and should better prepare them for those studies.

Proposals are sought from college and university mathematical sciences faculty working in partnership with middle and/or high school mathematics teachers. Interested middle and high school teachers are strongly encouraged to seek out college and university mathematical sciences faculty in the formulation of proposals to benefit middle and high school students; the Foundation is particularly interested in projects originating from the middle or high schools.

Grants will be up to \$6000 and will be made to the college or university of the project director for a one-year project. To provide maximum flexibility, unexpended funds may be carried forward. Some grants may be renewed up to a maximum of three years.

***Deadline for Proposals is
15 April 2010***

More detailed information is available on the program webpage www.maa.org/dolciani
